

WITH BROMETHALIN

PREMIUM ACTIVE FOR KNOCKDOWN OF RODENT POPULATIONS AND INFESTATIONS

TOMCAT with Bromethalin Baits contain the premium active ingredient Bromethalin, excellent for proven control of high rodent populations and tough infestations. Bromethalin is an acute, non-anticoagulant active that will begin to kill rats & mice in 2 or more days after consuming a lethal dose, faster than anticoagulant baits. Due to a quick knockdown when compared to anticoagulants, more rodents can be controlled with less bait. Each block of Tomcat with Bromethalin Chunx kills up to 12 mice*

- Proven combination of palatability and effective control
- Bromethalin is an acute, non-anticoagulant active ingredient
- Kills by affecting the rodents' nervous system – Bromethalin is an ATP Inhibitor, which prevents the transfer of energy across nerve cells
- Kills rats and mice in 2 or more days after consuming a lethal dose
- Rodents will cease feeding after consuming a lethal dose, requiring less bait to be used compared with other anticoagulant baits
- Each block kills up to 12 Mice*
- Available in 4lb Chunx, 22ct x 3oz Place Pacs, 5lb Bulk Pellets and 5lb Meal Bait

* based on no-choice lab testing
